

Adrià Esteve

Since 2017 **Adrià Esteve** is Quality Assurance Officer at Fusion for Energy (F4E), which is the European Union organisation managing Europe's contribution to ITER. He also deputizes the Head of Quality Assurance Unit and coordinates Quality Control activities within the agency.

Prior to his current position, he has been working as Supplier Quality Assurance Coordinator for 10 years in the Wind Power Generation sector within GENERAL ELECTRIC and ALSTOM. The main focus in these positions has been the deployment Supplier Quality Assurance and Quality Control activities in the Supply Chain by means of leading SQA teams (EMEA and LAM), qualifications, supplier audits, problem solving, monitoring & surveillance activities, inspection plans and improvement projects of several commodities and processes such as mechanical parts, welded works, castings, forgings, machining, composites, coatings and related inspection techniques (Mechanical tests, NDT, DT & metrology). Previously he worked in the automotive and research sectors.

Adrià is a Mechanical & Materials Engineer and holds a Post-Graduation in Quality Management, Strategic Planning and Lean Management with more than 20 years of professional experience, last 18 years working in the Quality field (in automotive, renewable energy and nuclear sectors). He is CQI/IRCA Lead Auditor, Six Sigma Green Belt and PMP® Certified.
