

Cristian Casanova

Cristian Casanova is the Corporate Risk Manager at Fusion for Energy (F4E). Before being named risk manager in November 2023 and since 2017 Cristian was the program manager for the manufacturing and delivery of the European Vacuum Vessel to ITER.

Prior to joining Fusion for Energy, Cristian has been holding several managerial positions at Alstom and General Electric within the steam power generation division for the construction of coal power plants, from project director to managing director of GE Boiler Slovenia. Previous to his work at Alstom/GE, Cristian was construction manager for Ferrovial and ACS/Dragados.

Cristian earned an MBA from INSEAD, a Civil Engineering degree from INSA Toulouse/UPC and a Master's degree in Civil Engineer from University of California Irvine, where he was a Balsells Fellowship recipient.
